the eastern partnership eap was launched in 2009 to strengthen institutional economic and political relations between the european union eu and the six partnership countries armenia azerbaijan belarus georgia moldova and ukraine further the adoption of the european green deal egd for these countries can be seen as a turning point in policymaking as well as an indication that the green deal will become a guide to transforming the economy and making it more sustainable this book presents an innovative geopolitical multidimensional survey of eap eu relations and the future of europe it analyses the situation of the partnership countries in the context of

sustainable development and explores the historical and strategic context of the integration of the green deal and its impact on the development of Europe. It examines the necessary conditions for the operation of the EGD in the countries of the EAP and examines the influence of geopolitical conflicts and their impact on the implementation of the EGD in the region. The book studies the political, economic, socio-demographic dimensions of geopolitics and their effect on EGD implementation in the partnership and finally identifies and evaluates the key challenges and features a comparative analysis of the European Green Deal and similar environmental initiatives in other parts of the world. Such an approach helps place European efforts in a global context. This is a valuable reference for students, scholars, and researchers of economics, politics, geography, history, European studies, international relations, and environmental policy. Policymakers at the European, regional, and local government level will benefit from the book's policy recommendations and comprehensive insights.

Power systems operation with 100 renewable energy sources combines fundamental concepts of renewable energy integration into power systems with real-world case studies to bridge the gap between theory and implementation. The book examines the challenges and solutions for renewable energy integration into the transmission and distribution grids and also provides information on design, analysis, and operation, starting with an introduction to renewable energy sources and bulk power systems, including policies and frameworks for grid upgradation. The book then provides forecasting, modeling, and analysis techniques for renewable energy sources. Subsequent chapters discuss grid code requirements and compliance before presenting a detailed breakdown of solar and wind integration into power systems. Other topics such as voltage control and optimization, power quality enhancement, and stability control are also considered. Filled with case studies, applications, and techniques, *Power Systems Operation with 100 Renewable Energy Sources* is a valuable read to researchers, students, and engineers working towards more sustainable power systems. It explains voltage control and optimization for both transmission grid and distribution, discusses renewable energy integration into the weak grid system along with its challenges, examples, and case studies, offers simulation examples of renewable energy integration studies that readers will perform using advanced simulation tools, presents recent trends like energy storage systems and demand responses for improving stability and reliability.

President Bio started his second term following the June elections. Allegations of electoral fraud led the opposition to temporarily refuse to participate in any level of governance, but the political stalemate ended in October. The authorities have taken bold steps to tackle macroeconomic imbalances, but reform implementation remains a challenge amid the large adjustment, need for a dramatic cost of living crisis, and the tense political environment. The ECF arrangement, a key policy anchor, is coming to an end with the conclusion of the eighth and final review. The authorities have signaled their interest in a successor ECF arrangement as well as in support under the RST.

The latest World Economic Outlook reports signs that policy tightening is starting to cool activity, despite core inflation proving persistent. Risks are more balanced as banking sector stress has receded, but they remain tilted to the downside. Monetary policy should stay the course to bring inflation to target, while fiscal consolidation is needed to tackle soaring debts. Structural reforms are crucial to revive medium-term growth prospects amid constrained policy space.

The present publication contains the environmental performance review of Mongolia. The report takes stock of progress made by the country in the management of its environment since 1987.
