but complement each other all relevant scenes from the two plays taken together exhibit a comprehensive image of the discourse of conscience in the elizabethan age it ranges from personified character and externality to an inner contemplation with god and man s own soul from an exhilarating righteous feeling to purgatory like torment on earth it shows a broad understanding of the term much more extensive than our modern perception of it which has narrowed down to the single meaning of discernment between good and evil nevertheless conscience stands in a long tradition of philosophical debates and shakespeare adds his own touch to it with richard iii and hamlet leaving modern eyes with a better appreciation of concept of conscience
