a wonderful book on the luftwaffe s ww2 operations german air force and its struggle to
defend germany from the allied bomber attacks fsaddon the luftwaffe over germany tells the
story of one of the longest and most intense air battles in history the daylight air struggles
over germany during world war ii involved thousands of aircraft dozens of units and hundreds
of aerial engagements until now there has been no single book that covers the complete story
from the highest levels of air strategy to the individual tales of fw 190s bf 109s and me 262s in
air combat against the american bomber streams this ground breaking work explores the
detrimental effect of luftwaffe theory and doctrine on the german air arms ability to defend
the homeland once the allied combined bomber offensive began in earnest by mid 1944 they
had lost the battle but had exacted a terrible price from the americans in the process the
product of a ten year collaboration between two noted luftwaffe historians this work fills a
major gap in the literature of world war ii the authors have examined original war diaries
logbooks doctrine manuals after action reports and interviews with many combat veterans to
produce a richly detailed account illustrated with nearly two hundred photographs as well as
new maps and diagrams this is the standard work on the subject looking for a better book on
the german air defense of the third reich in daylight during the war would probably be a
useless endeavor a wargamers needful things
