while the mediterranean basin biodiversity hotspot is well known for its globally important biodiversity its freshwater biodiversity has not been as widely recognized for its importance through this project freshwater key biodiversity areas kbas have now been identified mapped and validated throughout much of the mediterranean hotspot it is now important to raise awareness of their status as validated freshwater kbas and to develop plans

for appropriate conservation actions at these sites as this biodiversity is highly threatened largely due to the conflicting demands upon a diminishing supply of fresh water which is further exacerbated by the increased severity of drought across the region
