this short book offers a dazzling new interpretation of paul klee's most famous work his angelus novus 1920 which was purchased by walter benjamin and became the model for his angel of history a figure saturated with jewish mysticism that he introduces in his theses on the philosophy of history in 2014 the celebrated american artist r h quaytman made a surprising discovery about klee's work when she examined it at the jewish museum in israel she realized that klee had carefully pasted the angelus down over another image a face leaving just a finger's breadth of it showing through forensic science and lots of sleuthing it was determined that face belonged to martin luther behind the angel of history tells the story of how quaytman solved the mystery of who lurks behind klee's angel it then plunges into questions about why a face long hidden beneath another picture might matter the book travels through a tangle of loaded conversations among images from klee's angelus to benjamin's own drawing of a crucified angel from klee's angelus to quaytman's own layered panels meditating on its secret

in this incisive new work eli friedlander demonstrates that walter benjamin's entire corpus from early to late comprises a rigorous and sustained philosophical questioning of how human

beings belong to nature across seemingly heterogeneous writings friedlander argues benjamin consistently explores what the natural in the human comes to that is how nature is transformed actualized redeemed and overcome in human existence the book progresses gradually from benjamin s philosophically fundamental writings on language and nature to his goethean empiricism from the presentation of ideas to the primal history of the paris arcades friedlander s careful analysis brings out how the idea of natural history inflects benjamin s conception of the work of art and its critique his diagnosis of the mythical violence of the legal order his account of the body and of action of material culture and technology as well as his unique vision of historical materialism featuring revelatory new readings of benjamin s major works that differ sometimes dramatically from prevailing interpretations this book reveals the internal coherence and philosophical force of benjamin s thought

novel

in the half century before walter scott s waverley dozens of popular novelists produced historical fictions for circulating libraries this book examines eighty five popular historical novels published between 1762 and 1813 looking at how the conventions of the genre developed through a process of imitation and experimentation

temporal divergence creates a need for new narratives and paradigms in diverging time david carvounas supports this assertion through detailed expository and diagnostic readings of kant hegel and marx he focuses on their contribution to our understanding of modernity as an epochal shift in the relationship between past and future recasting the significance of the past and future of the modern present despite their different solutions to the problem of temporal coordination they urged the modern world to look not to the past but to the newly opened future for continuity meaning and purpose this book not only offers a fresh look at a defining characteristic of modernity but also makes a compelling case that a coherent modern temporal structure requires a sustainable orientation toward the future an orientation that kant hegel and marx delineate in distinctive and powerful ways
