written specifically for athletic trainers the updated second edition of clinical pathology for athletic trainers recognizing systemic disease emphasizes practical knowledge development of clinical skills including evaluation and treatment and development of clinical

decision making abilities inside clinical pathology for athletic trainers second edition you will find an expanded discussion of the pathophysiology associated with general medical conditions as well as case studies which facilitate the student's ability to formulate a differential diagnosis and make clinical decisions. Dr. Daniel P. O'Connor and Dr. Louise Fincher have incorporated all of the didactic and psychomotor competencies listed within the general medical conditions and pathology of injuries and illness domains from the fourth edition of the NATA Educational Competencies into this unique text. Competencies that are addressed throughout the text are conveniently listed at the beginning of each chapter in which they are referenced. Individual lab activities are included within some chapters to aid in the development of the psychomotor skills related to evaluating general medical illnesses. Instructors will enjoy new ancillary materials such as test bank questions and powerpoint slides. What's new in the second edition: new chapters on pharmacology, dermatology and eyes, ears, nose, throat and mouth; integration of NATA position statements and consensus statements; expanded discussion on the physical exam including detailed instructions for evaluation procedures; new illustrations and a color atlas; new icons throughout the text to represent action to be taken by the athletic trainer during an evaluation such as physician referral or activation of emergency action plan; lab activities inside the second edition; use of pharmacology resources; assessment of temperature; assessment of vital signs: heart rate, blood pressure and respiration rate; cardiac auscultation, pulmonary auscultation and percussion; peak flow; expiratory rate; abdominal auscultation, percussion and palpation; urinalysis; assessment of blood glucose levels; use of the otoscope; use of the ophthalmoscope; sensory function, motor function, reflex function; cranial nerve assessment with expanded discussions and case studies; new chapters and lab activities and an emphasis on the development of clinical skills. The second edition of *Clinical Pathology for Athletic Trainers: Recognizing Systemic Disease* is a must have for today's athletic training students and clinicians.

This fully updated textbook provides pathophysiology students with a complete knowledge base that includes the latest data from research on environmental and genetic factors that influence the disease process.

Written for nursing students and students studying for paramedical careers, this handbook takes a conceptual approach rather than a disease-centered approach. Case studies provide real world examples and student activities are included.

Master core content areas, test your knowledge, prepare for certification and clinical practice. Assure that you have the in-depth understanding of advanced pathophysiology, advanced pharmacology, advanced health assessment, diagnostic reasoning, clinical decision making and the interplay between these concepts that are required for
