this title was first published in 2001 engaging with both management science and interactionist sociology this book employs a case study of stroke rehabilitation in hospitals to clarify a range of practical organizational concerns and conceptual issues related to decision making in complex organizations

a manual for mindful focusing a new integration of western psychology and buddhist mindfulness techniques for accessing your inherent wisdom and solving life s problems ever come up against one of those moments when life requires a response and you feel clueless we all have but there s good news you have all the wisdom you need to respond to any situation even the impossible ones it s a matter of tuning in to your felt sense that subtle physical sensation that lives somewhere between your conscious and subconscious mind and that can be accessed through focusing the well known method developed by the psychologist eugene gendlin david rome s technique of mindful focusing unites gendlin s method with buddhist mindfulness practices to provide a wonderfully effective method for accessing your felt sense so you can problem solve deal with challenges and respond honestly and creatively to the world around you

a strong and fluent competency in mathematics is a necessary condition for scientific technological and economic progress however it is widely recognized that problem solving reasoning and thinking processes are critical areas in which students performance lags far behind what should be expected and desired mathematics is indeed an important subject but is also important to be able to use it in extra mathematical contexts thinking strictly in terms of mathematics or thinking in terms of its relations with the real world involve quite different processes and issues this book includes the revised papers presented at the nato arw information technology and mathematical problem solving

research held in april 1991 in viana do castelo portugal which focused on the implications of computerized learning environments and cognitive psychology research for these mathematical activities in recent years several committees professional associations and distinguished individuals throughout the world have put forward proposals to renew mathematics curricula all emphasizing the importance of problem solving in order to be successful these reforming intentions require a theory driven research base but mathematics problem solving may be considered a chaotic field in which progress has been quite slow

a reply by john gother to william sherlock s a papist not misrepresented by protestants
