this is not another collection of contributions on a traditional subject even more than we

dared to expect during the preparatory stages the papers in this volume prove that our thinking about science has taken a new turn and has reached a new stage the progressive destruction of the received view has been a fascinating and healthy experience at present the period of destruction is over a richer and more equilibrated analysis of a number of problems is possible and is being carried out in this sense this book comes right on time we owe a lot to the scholars of the kuhnian period they not only did away with obstacles but in several respects instigated a shift in attention that changed history and philosophy of science in an irreversible way a clearcut example we borrow it from the paper by Risto Hilpinen concerns the study of science as a process and not only as a result moreover they apparently reached several lasting results e.g. concerning the tremendous impact of theoretical conceptions on empirical data apart from baffling people for several decades this insight rules out another return to simple minded empiricism in the future

behavioural economics and experiments addresses key topics within behavioural economics exploring vital questions around decision making and human nature assuming no prior knowledge of economics the book features wide ranging examples from literature film sport neuroscience and beyond Ananish Chaudhuri explores the complex relationships between human behaviour society and decision making introducing readers to the latest work on heuristics framing and anchoring as well as ideas around fairness trust and social norms the book offers a fresh perspective on issues such as decision making under uncertainty firms pricing decisions employment contracts coordination failures in organizations preventing bubbles in financial markets this is an ideal introduction for students of behavioural economics experimental economics and economic decision making on economics public policy psychology and business related programmes and will also be accessible to policymakers and curious laymen

experimental psychology that studies external behaviour as well as the internal processes of the different stages of human development as also of animals is considered the most important branch of psychology the credit for establishing psychology on a scientific basis is given to experimental method the scope of experimental psychology is widening with the invention of new tools and instruments for experiments it is the core of the curriculum prescribed for psychology in almost all the Indian universities both at the undergraduate and postgraduate levels the present book experimental psychology is a textbook focusing on the experimental methods in the fast growing area of psychology it attempts to provide an in depth study of important areas covered by experimental psychology psychophysics animal psychology learning psychology psychology of individual differences child psychology education psychology clinical psychology industrial psychology etc besides these it includes experiments in physiological psychology nervous system mental processes and aspects of human behaviour the book has been particularly designed to help students prepare for university examinations the language used is lucid simple and unburdened by technical jargon the presentation of subject matter has been made from the pragmatic viewpoint following a tried and tested pedagogical style enabling the reader to easily understand and grasp the subject it is hoped that it will prove highly useful to both students and teachers of psychology
