using this book can help the busy architect engineer contractor to optimize online time by determining the key sites to visit before connecting to the internet topics are conveniently arranged by subject showing where to find the index sites together with details of many specialist sites

knowledge co construction in online learning is a comprehensive foundational resource that explores the study of social construction of knowledge through platforms social dynamics and other aspects of today s technology enhanced education the interactive spaces from formal computer supported collaborative learning settings to informal social media integrative environments that comprise asynchronous online learning offer a rich source of data for analyzing teaching and learning how then can researchers and designers in educational technology instructional design the learning sciences and beyond most effectively analyze the content and data generated by these complex co creations of knowledge grounded in sociocultural and social constructivist theories of learning and driven by the globally renowned interaction analysis model this book applies statistical and computational methods to study the group interactions and social networks that yield newly constructed knowledge during virtual learning experiences its unique social learning analytic methods enhance the analysis of social dynamics that support knowledge construction so often missing from mainstream learning analytics holistic and cyclical in its approach to online learning experiences this essential volume written for novice and experienced researchers transcends the field s research paradigm conflicts blends qualitative and quantitative approaches with new digital media tools and exemplifies how research questions and designs can incorporate and automate evolving forms of inquiry

routledge handbook on labour in construction and human settlements presents a detailed and comprehensive examination of the relationship between labour and the built environment and synergises these critical focus areas in innovative ways this unrivalled edited collection of chapters analyses problems and presents possible solutions related to the employment and conditions of workers in the construction industry it provides comprehensive coverage of the relationship between the global workforce and the built environment and is divided into four topical areas how labour and the built environment relate to development employment generation in the built environment quality of employment in the built environment and the impact of the built environment on labour in other sectors underpinning the entire book is the premise that the way the built

environment is produced and its main products buildings cities and towns have an impact on large numbers of workers at the same time the quality of the built environment requires construction workers who are well trained and with good working conditions while cities and towns are the engines of economic growth they will not be able to fulfil their economic potential if poverty in the workforce is not addressed those who are unemployed underemployed or work in unfavourable conditions cannot fully contribute to production and at the same time are limited in their ability to purchase goods and services therefore limiting economic growth and restricting improvements in their living standards in addition investments in infrastructure housing and inner city redevelopment cannot be sustainable if labour issues i e poverty are not addressed this book aims at analysing this complex set of issues comprehensively and will be essential reading to a wide range of researchers across the interdisciplinary intersections of construction business and management economic development urban studies sociology political science and project management

real estate construction and economic development in emerging market economies examines the relationships between real estate and construction sectors and explores how each sector and the relationships between them affect economic development in emerging market economies emes throughout the book the international team of contributors discuss topics as diverse as real estate finance and investment housing property development construction project management valuation sustainability and corporate real estate in doing so the book demonstrates how the relationship between construction and real estate impacts on economic development in countries such as argentina brazil colombia china ghana nigeria turkey lithuania hungary and slovenia topics include the role of real estate brokerage in improving the living standards of citizens the effect of a mineral boom on construction cycles real estate values and the socio economic conditions of people in boom towns and cities corporate real estate management practices and how they affect economic growth and the synergies between construction and real estate and how they in turn affect economic development this book will be of interest to those studying and researching real estate construction development studies urban economics and emerging market economies
