the study of language has changed substantially in the last decades in particular the development of new technologies has allowed the emergence of new experimental techniques which complement more traditional approaches to data in linguistics like informal reports of native speakers judgments surveys corpus studies or fieldwork this move is an enriching feature of contemporary linguistics allowing for a better understanding of a phenomenon as complex as natural language where all sorts of factors internal and external to the individual interact chomsky 2005 this has generated some sort of divergence not only in research approaches but also in the phenomena studied with an increasing specialization between subfields and accounts at the same time it has also led to subfield isolation and methodological a priori with some researchers even claiming that theoretical linguistics has little to offer to cognitive science see for instance edelman christiansen 2003 we believe that this view of linguistics and cognitive science as a whole is misguided and that the complementarity of different approaches to such a multidimensional phenomenon as language should be highlighted for convergence and further development of its scientific study see also jackendoff 1988 2007 phillips lasnik 2003 den dikken bernstein tortora zanuttini 2007 sprouse schütze almeida 2013 phillips 2013

the goal of eliminating disparities in health care in the united states remains elusive even as quality improves on specific measures disparities often persist addressing these disparities must begin with the fundamental step of bringing the nature of the disparities and the groups at risk for those disparities to light by collecting health care quality information

stratified by race ethnicity and language data then attention can be focused on where interventions might be best applied and on planning and evaluating those efforts to inform the development of policy and the application of resources a lack of standardization of categories for race ethnicity and language data has been suggested as one obstacle to achieving more widespread collection and utilization of these data race ethnicity and language data identifies current models for collecting and coding race ethnicity and language data reviews challenges involved in obtaining these data and makes recommendations for a nationally standardized approach for use in health care quality improvement
