looks at proportion and patterns in plant and animal structure art music and architecture

one of the delights of life is the discovery and rediscovery of patterns of order and beauty in nature designs revealed by slicing through a head of cabbage or an orange the forms of shells and butterfly wings these images are awesome not just for their beauty alone but because they suggest an order underlying their growth a harmony existing in nature what does it mean that such an order exists how far does it extend the power of limits was inspired by those simple discoveries of harmony the author went on to investigate and measure hundreds of patterns ancient and modern minute and vast his discovery vividly illustrated here is that certain proportions occur over and over again in all these forms patterns are also repeated in how things grow and are made by the dynamic union of opposites as demonstrated by the spirals that move in opposite directions in the growth of a plant the joining of unity and diversity in the discipline of proportional limitations creates forms that are beautiful to us because they embody the principles of the cosmic order of which we are a part conversely the limitlessness of that order is revealed by the strictness of its forms the author shows how we as humans are included in the universal harmony of form and suggests that the union of complementary opposites may be a way to extend that harmony to the psychological and social realms as well

this second volume discusses state of the art applications of equivalent circuit models as they pertain to solving problems in battery management and control readers are provided information on how to use models from volume i to control battery packs along with discussion of fundamental flaws in current approaches in addition volume ii introduces the ideas of physics based optimal battery controls and explains why they can be superior to the state of the art equivalent circuit controls

includes annual report of its council 1941 48 in pt 1
